"ADD MOTION TO YOUR BED COLLECTION"

www.ersan.com.tr

 **eersan**

Ersan within its concept, designed the products as the foreign market required and at the 70.000m² modern facilities it created sleep collection like serial and boutique production according to the market needs.

Ersan, the global leading company of sleeping sector, has started its first business life at the metal sector.

By the way under the brand name A&E Primus Betten which states in Cologne Germany, presents top level fantastic designs to the customer interest and improve that local market day by day. It submits aesthetics products people who has different and high standard life styles.

Giving priority to R&D activities with the purpose of carrying out pioneering projects in the bedding sector, using its cumulative knowledge through its trading experience and with its professional staff who are innovative and have a broad vision.

These are stable and adjustable boxspring bed sets, pullback rail system boxspring.

In a professional meaning it has the capability of producing more over 30 years. In free zone, during year 2011 has passed to soft bedding group, moved its metal experience to the bedding sector with the same aesthetic and quality concept.

Staying updated following the ever progressing technology without losing the first excitement of entrepreneurship in the state of art manufacturing facilities founded with the newest technologies in mind.

At the same time stone wash beds, bunkbeds and folding beds are found at its production group which are produced in modern washing and painting units. In addition to these, Ersan produces interior constructions of the electrical boxsprings, first quality mattresses for home and hotel concept.

Ersan adapts its commercial doctrines and vision in the direction of researcher soul to all personnel. In addition to having professional team and it offers solutions, suggestions with new ideas to the market requirements. It aims to present "Ersan Sleep Comfort" for every home it goes on progressing with innovative perspective in accordance with its principles.

Picasso

We called Picasso "Design of Dreams". And we have included the designs you have dreamed of, in the production, and in the mattress. We went in deep for Picasso; we have carefully identified all the materials we had gathered. As a result of the touch of our craftsmen, we were able to bring out to the daylight the glamorous elegance, and the comfort that would surround you in everywhere.

Picasso, which we have prepared with this understanding as well, offers you sleep comfort beyond your dreams.

Salvador

In order to reach perfection, it is first necessary to think perfectly. Somehow or the other, perfect thinkers bring out the best together.

The best materials and the best hands... That's how we acted in Salvador, we thought the perfect, and we produced what is perfect.

For the art lovers...!

Vincent

A&E Primus Betten does not overlook any detail in design, and continues to work until perfection is achieved. Prepared by the selection of our professional designers, Vincent promises you nothing less but the comfort.

Sandro Designed

Sandro

Dynamic and sportive... An appealing bed base model for those who want to create a different and striking environment in their bedrooms. Thanks to its legs high from the ground, it makes cleaning easy, adding hygiene to your living spaces.

Dino

Dino, where naturality presents itself in the most striking way, offers a sporty design conception with a modern interpretation.

Matisse

A&E Primus Betten continues to reveal its difference also in specially designed bed bases and bedheads, each with a different story and stance. Whether it be a bed base inspired by the beautiful Helen, or a bed base inspired by the works of famous painters like Picasso, Leonardo and Dali...
